1. Introduction

The StudyFlow App is a smart educational productivity platform designed to help students and teachers manage learning materials, lesson plans, and study guides effectively. The application was developed using Base44 and provides an organized dashboard where users can create, manage, and publish educational content.

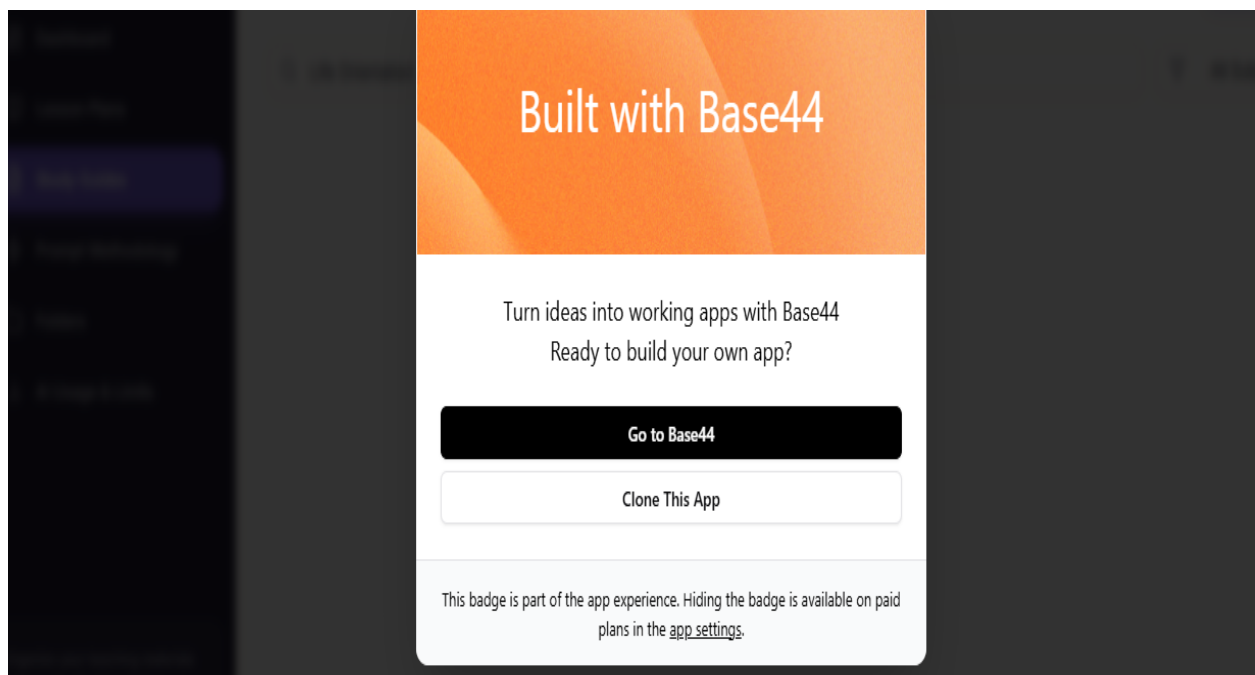

2. Main Features

- Dashboard overview with lesson statistics
- Lesson plan management
- Study guide creation and publishing
- Folder organization system
- AI-powered prompt methodology
- Search and filtering functionality
- Clean and user-friendly interface

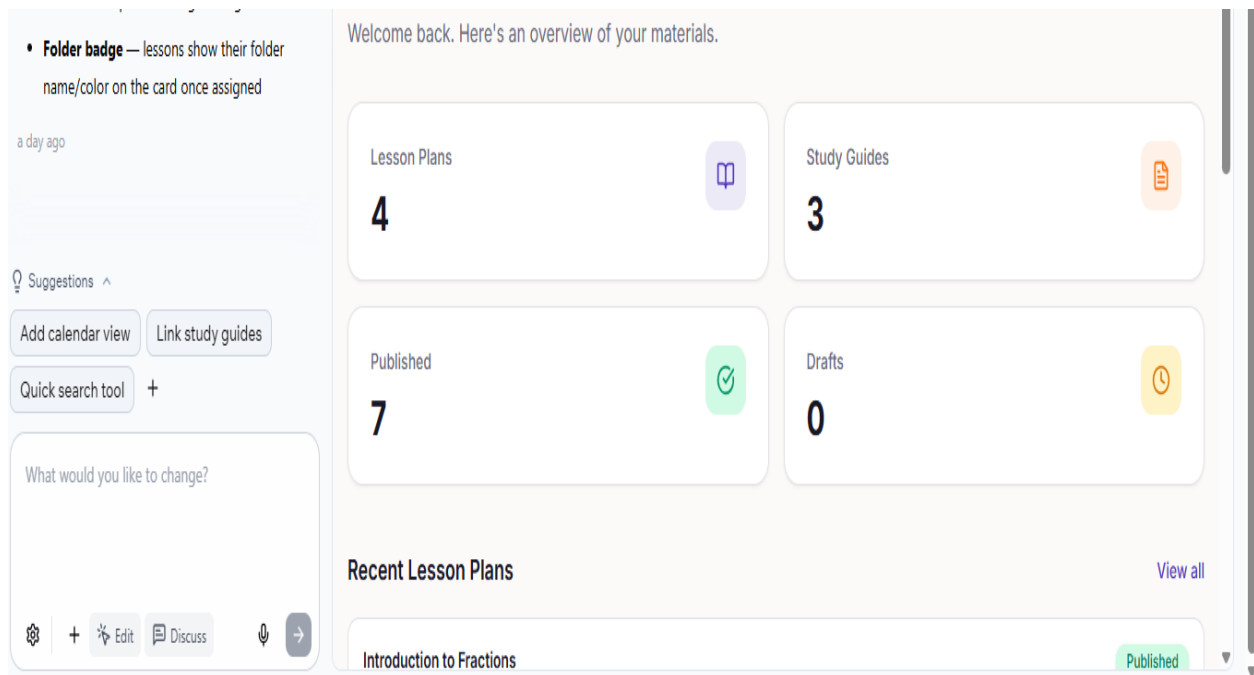

3. Application Screenshots and Explanations

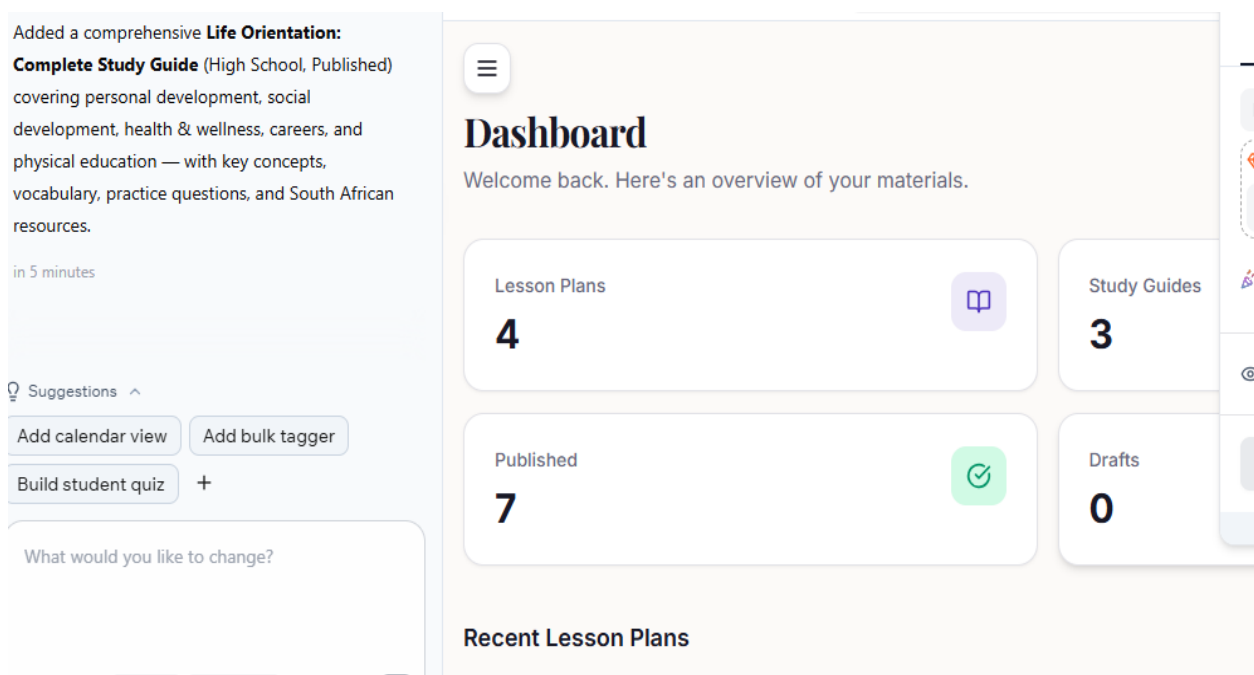

Dashboard Interface - Displays lesson plans, study guides, published materials, and drafts in an organized overview.

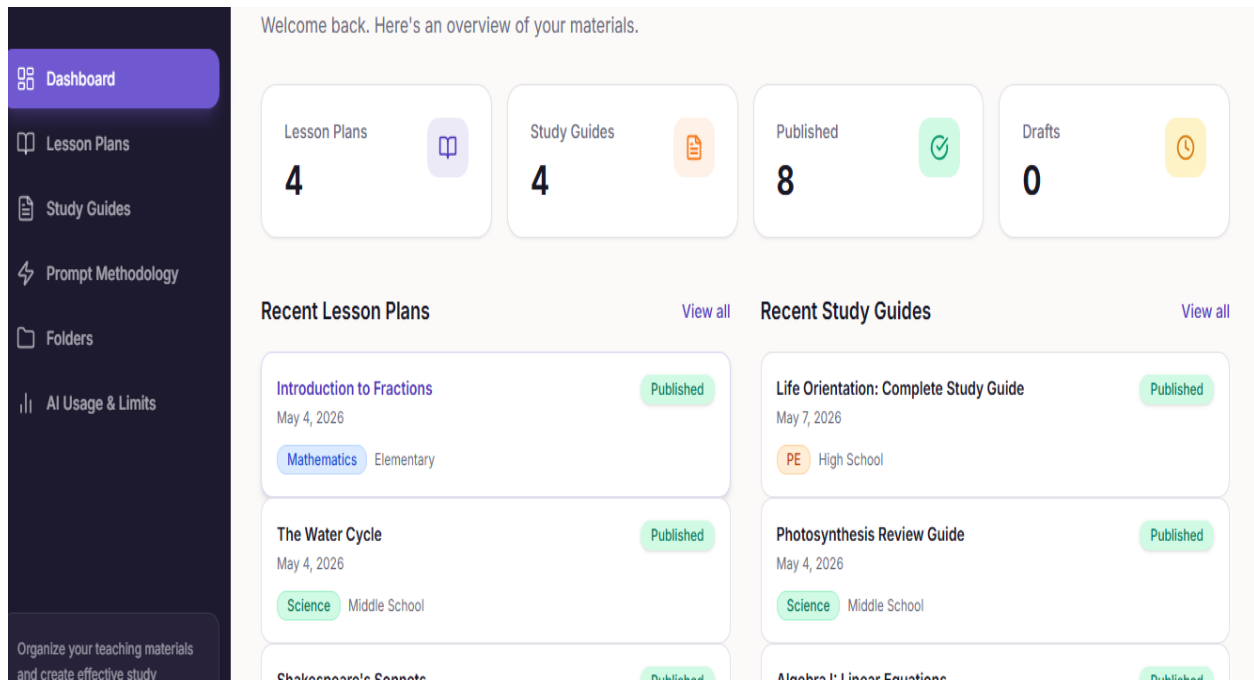

Base44 Integration - Shows the application running on the Base44 platform used for development and deployment.

Statistics Overview - Displays lesson plan statistics and recently published educational content.

Study Guide Management - Demonstrates the process of creating and managing educational study guides.

Full Dashboard View - Shows the complete layout of the educational management dashboard.

4. Advantages of the Application

- Improves organization of educational content
- Provides quick access to lesson plans and study guides
- Enhances productivity for teachers and students
- Simple navigation and modern interface
- Supports efficient educational content management

5. Conclusion

The StudyFlow App successfully combines educational content management, lesson planning, and study guide creation into one modern platform. Its clean design and practical features make it an effective solution for improving teaching and learning experiences.
